HYDROP | Independent Consultancy Practice
Specialists in the Management of Legionella and Water Quality

Full Stack Developer with 2nd Line support

Full stack developer required to join a busy IT team for a leading independent Consultancy Practice to work on development of the core software products.
The successful developer will join our prestigious and successful Consultancy Practice, developing a suite of Web/Windows/App based applications. This exciting opportunity requires a talented developer to deliver to a challenging programme.

Skills Required
☐ Solid skills in C# with .NET, SQL Server, Razor, CSS, ASP.NET and XML/JSON.
☐ Experience of both Desktop and Web application development.
☐ Knowledge of iOS and Android app development is advantageous.
☐ Knowledge of Microsoft Tools and web/windows based multi-tier architectures.
☐ Good degree and the ability to acquire skills and solve complex problems in a challenging and enjoyable environment.
☐ Excellent oral and written communication skills.
☐ Proven development experience.
☐ Highly motivated.

Key Responsibilities
☐ Design, develop and test software and solutions to fulfil requirements with agreed timescales.
☐ Work with clients, consultants, surveyors, and users to understand and analyse their needs and ensure these are catered for in proposed solutions.
☐ Understand existing systems and work with team to make ongoing improvements to products and processes.
☐ Provide excellent levels of documentation.
☐ Provide support for installation and user training requirements.
☐ Provide leadership and mentorship for junior developers.
☐ Support clients and their users with day-to-day operational issues of the products.

Additional Requirements
☐ UK Driving License
☐ Applicant will be CRB checked before starting with Hydrop to fulfil the requirements of some of our clients.

To apply, please send your CV and current salary details to Andie Harper at andie@hydrop.com or contact 01213542030 for more details.
