

Junior Legionella Risk Assessor

Hydrop E.C.S. Ltd

Who we are

Hydrop E.C.S.Ltd is a specialist provider of water hygiene consultancy services, supporting clients across the healthcare, commercial, industrial and public sectors throughout the UK. We are known for our technical expertise, customer-focused approach and commitment to maintaining the highest standards of water safety and compliance. We have steadily grown to a nation-wide team of Risk Assessors, Consultants and Authorising Engineers (Water), with our office located in Sutton Coldfield, West Midlands.

As the business continues to grow, we are looking for a Legionella Risk Assessor to join our team in the Midlands, helping clients manage risk, achieve compliance and maintain safe water systems.

Part of the Celnor Group

Celnor Group is a UK-based environmental services group operating across the Testing, Inspection, Certification and Compliance (TICC) landscape. With a growing portfolio of specialist businesses, Celnor provides essential services that protect people, property and the environment.

While each business retains its own identity, culture and technical specialism, all are supported by a central group function that invests in people, systems and long-term sustainable growth.

Job details

We're looking for a motivated individual to join our team as a Legionella Risk Assessor. This is an entry-level position where full training will be provided, making it an excellent opportunity for a recent graduate or someone looking to start a career in water hygiene and risk management.

As a Legionella Risk Assessor, you will be responsible for carrying out Legionella risk assessments across a varied client portfolio, identifying risks, providing practical recommendations, producing written reports and supporting clients in maintaining compliance with relevant legislation and guidance. The role requires a candidate who is able to drive and work across multiple sites, including nationwide travel and occasional overnight stays. There may also be opportunity for international travel. The role requires working in a range of different types of buildings including hospitals, commercial settings, schools and public buildings.

No previous industry experience is required. Our ideal candidate is someone with the right attitude, analytical mindset and willingness to learn.

This is primarily a field-based role suited to someone who thrives in a technical environment, enjoys solving problems, has an eye for detail, and takes pride in producing high-quality work.

What you will do

- Carry out Legionella risk assessments in accordance with industry guidance including BS8580-1.
- Inspect hot and cold water systems across a range of commercial, healthcare, educational and industrial sites.
- Produce detailed risk assessment reports and provide clear recommendations to clients.
- Identify compliance issues and advise on appropriate remedial actions.
- Working alongside experienced consultants and authorising engineers while completing your training
- Travelling to client sites with some overnight stays where required.
- Build and maintain strong working relationships with clients.
- Work collaboratively with internal teams and stakeholders
- Contribute to continuous improvement, compliance and quality standards

Who you are

You are a motivated professional who brings a practical, solutions-focused mindset.

You will ideally have:

- Experience of report writing, whether through university, employment or research
- A degree (or equivalent qualification), preferably in a scientific, engineering or environmental discipline
- A genuine interest in science and engineering
- Strong written communication skills with the ability to produce clear, concise reports.
- Proficiency in Microsoft office
- Confidence communicating with clients and colleagues
- Motivation to learn and develop professionally
- The ability to manage your own workload and work independently.
- A full UK driving licence.
- A high level of attention to detail and accountability.
- The ability to manage priorities effectively in a dynamic environment.
- A collaborative approach and a commitment to doing things the right way.
- Knowledge of water systems or the built environment is advantageous but not essential

Join us

You'll be joining a business where your contribution matters and where professionalism, integrity and teamwork are genuinely valued. As part of the wider Celnor Group, you'll benefit from group-wide investment, shared expertise and opportunities to develop your career as the organisation continues to grow.

The role is advertised at £28k minimum and £35k maximum.

What we'll provide

- Full training towards becoming a competent Legionella Risk Assessor
- Ongoing mentoring from experienced Consultants and Authorising Engineers (Water)
- Opportunities for professional development
- A varied role working across healthcare, commercial and public sector environments
- A supportive team committed to developing your career

Benefits

- Annual leave increasing yearly up to 25 days with long service, plus bank holidays
- Company car
- Fuel card
- Centralised hotel bookings
- All required risk assessing equipment including laptop, tablet computer and mobile phone
